

SMART GLASS 2013 ACCESSORIES

SMART Glass Industries provides excellent fittings with the highest quality and latest designs for the frameless glass industry.

All fittings are manufactured to provide a modern and contemporary appearance. Applications include balcony balustrade, pool fencing enclosures, commercial shopfronts and doors, shower screens and glass facades.

All frameless glass fittings are manufactured with the highest quality and can be supplied as a mirror polished or satin finish. The mirror polished finish is recommended as it will reduce "tea" staining and minimize maintenance. The stainless steel fittings are manufactured using high density investment casting which will enable all fittings to be clamped to structural glass without striping threads and therefore attaining a greater strength without increasing the stresses in glass panels. The fittings are designed to suit 10mm, 12mm and 15mm toughened glass.
